

Business and Information Technology Services and Solutions

Company Profile

Fairhaven Solutions, LLC is a Business and Information Technology (IT) consulting firm offering solutions that reliably deliver value to the stakeholders of your company. Fairhaven helps their clients become **nimble, reliable and efficient** in today's dynamic, technology-rich market by empowering teams and dramatically increasing operational efficiency.

Fairhaven's focus is on providing value through process. Their philosophy is that operational excellence can be achieved through the optimization of people, process and tools.

Fairhaven Solutions was formed in May 2000 and is headquartered in Lewis Center, Ohio. They are privately owned and have become a dominant force empowering both local and international clients.

Process

Today, sustained delivery of quality services requires more than heroic individuals. It requires a reliable process with a common view of how to develop solutions based on industry best practices. Our teams use our **Javelin** methodology to ensure solutions are delivered on time, on target and on budget by minimizing surprises and mitigating risks. This value statement allows clients to quickly increase productivity, decrease costs, and uncover new ways to reliably leverage solutions for strategic business gains.

Solution Offerings

Fairhaven offers a breadth of solution offerings to ensure your business is nimble, reliable and efficient.

Javelin Excel | Fairhaven's Training solutions offering provides standard and customized training programs to organizations who want to train people in the skills rarely taught in school. Fairhaven provides instructor-led training, development of entire training programs, mentoring and coaching on a wide range of topics including IIBA and PMI based curriculum. Their training programs are educational, energetic and interactive.

Javelin Empower | Fairhaven's Consulting solutions offering focused on providing our clients with a single solution development process tailored for their business goals, culture and environment. Our team is well versed in the science of assessing a client's needs, current process and challenges as well as the art of successfully tailoring an enterprise-wide methodology.

Javelin Create | Fairhaven's Development solutions offering is aimed at the development of key business applications. Fairhaven's staff is adept in uncovering and clearly articulating core business needs through a use case driven approach. This increases the probability that the solution will meet the needs of the end users and be readily adopted.

The Fairhaven Difference

For Fairhaven, reliably delivering value is not just a proposition. It's a promise. Tell them where you're headed and they'll help you get there.

On time. On target. On budget.
